Summary:	Ad Astra Club were in complete awe when they saw students from class 9 and 10 of ZP school were so capable of understanding Web Development. Students were thrilled to learn a technology and were motivated to become a developer one day. The speaker was able to cover and deliver an amazing seminar in very simple and understandable language. The session was definitely a success!
Feedback	The students were excited about their future and what it holds. They understand the concept properly and found it interesting to design such websites. They are ready for another such session.
