| <b>Activity Title:</b>     | Introduction to DJANGO Web Framework                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |
| <b>Date:</b>               | 19/09/2025                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |
| <b>Venue:</b>              | Lab 402                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |
| <b>Purpose:</b>            | To help students learn the basics of modern web development. It gave them hands-on experience in building web applications using Python and Django. This enhanced their practical skills and prepared them for real-world software projects.                                                                                                                                                                                                                                                                                     |
| <b>Speaker:</b>            | Manthan Mhatre                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
| <b>Audience:</b>           | Students from T.E and S.E AIML                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
| <b>Total Participants:</b> | 30 participants                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
| <b>Activity Performed:</b> | In the workshop, students were introduced to the basics of the Django web framework and its features. They learned how to set up Django, create a new project, and build simple web pages. The session covered working with models, views, and templates to develop a basic web application. Students also explored how to connect Django with a database. Hands-on activities were included to give practical experience in creating and running a Django project. The workshop ended with a short Q&A session to clear doubts. |
| <b>Activity Outcome:</b>   | After the workshop, students understood the basics of the Django web framework and its uses in web development. They gained practical experience in setting up Django projects and creating simple web applications. Participants learned how to use models, views, and templates effectively. They became familiar with connecting Django to a database and handling basic operations. The workshop improved their confidence in starting web development projects.                                                             |
